

Phase 2 Black Box Testing - Team 5

David Wood, Alexander Ferrard, Ayush Patel, Eric Vondrak, Sanjit Reddy Sama

Defect No.	Defect Description	Defect Severity	Test Case No.
1	User can log-in with a non-Purdue and non-Microsoft email address	3	Introduction 003
2	When the user types in "help" before logging in the bot doesn't reply with information about logging in	3	Introduction 004
3	If you invite people to an event and do not give a valid email, it logs you out	2	See Below
4	If you a create event with a duplicate name, it throws an SQL duplicate key error	2	See Below
5	If you try to edit an event name, it throws a bot error and does not modify the name	3	Events 004
6	Adding a responsibility throws an error saying the eventID is invalid when it is	1	See Below
7	Throws an SQL error when editing the start time of an event	2	Events 006
8	Adding a cost to yourself throws an SQL error	1	Charges 002
9	Inviting yourself or another person to an event sends an error	2	Events 007
10	Editing a Spotify url does not add it to the database	2	Spotify 002
11	After exporting a file, you get logged out	3	Events 008
12	Costs show up as 0.1 no matter what the actual value	1	Charges 002
13	RSVP doesn't show up in help menu	3	RSVP 001

14	Sends an SQL error when editing the end time of an event	1	Events 006
15	You can add a cost with no amount which doesn't make sense	2	Charges 002
16	RSVP functionality is missing	1	RSVP 001
17	"[Command name] help" functionality is missing	2	See Below
18	When you type "hello", you do not get a greeting message from Jaylo	3	Introduction 001
19	When you give the bot an input string of the incorrect format, instead of informing the user that their format is incorrect, the program shows an SQL error	3	See Below
20	When event is exported, the .ics file does not create an event in the Calendar app at the appropriate time corresponding to the event's time	3	Events 008
21	When listing costs, all values are listed twice	3	Charges 001
22	Approving a cost does not work	2	Charges 005
23	Paying a charge does not work	2	Charges 004
24	Inviting people using a CSV file does not work and causes the user to log out	2	See Below
25	If you edit an event and don't input a valid field name, it will prompt you for the name of the event, and then it says that it deleted the event	2	See Below

Additional Test Cases ***THIS IS “SEE BELOW”***

Defect No. 3

- A. Events 009, invalid email, Severity 2
- B. Invite someone to an event with an invalid email address.
- C. Bot sends back an error telling the user to input a valid email.

Defect No. 4

- A. Events 010, repeat event name, Severity 2
- B. Create an event with the same name as an already created event.
- C. Bot sends back an error saying the event was already created.

Defect No. 6

- A. RSVP 005, add responsibility, Severity 2
- B. Send “Add responsibility” to bot.
- C. Bot responds with prompts to create a responsibility.

Defect No. 17

- A. Introduction 006, command help, Severity 3
- B. Send “<Any Command Name> help” to the bot.
- C. Bot responds with the command’s uses and syntax.

Defect No. 19

- A. Introduction 007, invalid format, Severity 3
- B. Send any command in an incorrect format.
- C. Bot responds with the correct format to send the command in.

Defect No. 24

- A. Events 011, invite using CSV, Severity 2
- B. Invite someone to an event with an attached CSV file.
- C. Every person in the CSV file gets invited.

Defect No. 25

- A. Events 012, invalid field to edit, Severity 2
- B. Send edit event, then send any invalid command.
- C. Bot responds with an error saying invalid field.
